

Sustainable, Stunning Spaces

[rev_slider_vc alias="slider-main-boxed"]

A division of [Mike Wye](#), **CORKCABIN** utilises our expertise in sustainable building to bring you an exciting range of converted shipping containers.

Bespoke, inspiring and functional spaces which have been created with sustainability at the forefront of the design process. **CORKCABIN** is a contemporary mobile space which also blends harmoniously with natural surroundings.

☀ **Studio** ☀ **Office** ☀ **Summerhouse** ☀ **Retail Unit** ☀ **Affordable Home** ☀ **Glamping** ☀

[Decorative Cork Board](#) is used externally to both insulate and create a unique appearance. Choose from a range of external cork facade designs to customise your individual **CORKCABIN**.

The interior is insulated with natural wood fibre board finished with sustainably sourced and certified timber cladding. Double glazed accoya windows and doors are fitted as standard. An engineered oak flooring with a natural cork board underlay is included to add to that special look.

A range of stunning, flexible lighting solutions are included to enhance the mood.

You can also add an optional base of [GEOCELL Foam Glass](#) aggregate to insulate under your **CORKCABIN**. This provides a

sustainable, free draining base with oak sleepers to complement the look.

CORKCABIN[®]

Whether its a stunning home office, studio, summerhouse or a retail unit, **CORKCABIN** provides a luxurious and practical solution for extra space.

CORKCABIN is based upon a 20 foot steel shipping container – but the similarity stops there!

Specification

[Decorative Cork Board panels](#) are used externally to both insulate the outside and create a unique appearance. Choose from our amazing range of designs to create your own personal look for your individual **CORKCABIN**.

External colour-wash LED panels light up your entry and also create an external lighting mood – change the colour to create your own ambiance!

Open the full height double glazed French doors into a warm inviting interior. Double glazed doors and full length picture window are made in beautiful, sustainable accoya wood with a linseed treatment. Together they create a light and airy environment with an aura of spaciousness.

Change the mood by dimming the central LED warm white panels. Let the colour-wash LED lighting panel create a range of atmospheric colours at your fingertips.

Internal walls and ceiling are insulated with natural wood fibre boards and clad with sustainable timber panels. You can choose to decorate in a fantastic range of natural oils, stains and paints with a kaleidoscope of colours and finishes available.

Keep your feet cosy with a insulated the floor using natural cork boards. This is finished with the warmth and functionality of engineered oak floorboards complemented by solid oak skirting.

To complement the wow factor of the lighting design many practical features are built in. With ample power sockets, lighting sockets and ethernet capability as well as an external weatherproof power socket provided.

Internal Dimensions

- Length = 5.80 m
- Width = 2.26 m
- Height = 2.23 m

Price £21,600 (including VAT)

Crane lorry delivery available throughout the UK. Typically cost is around £1,000+VAT, but may vary depending on distance from our base in the south west. Obviously your **CORKCABIN** can only be sited where access is suitable for this type and size of vehicle.
